

Safety Data Sheet Equiguard Plus

1. Identification of Substance & Company

Product

Product name Equiguard Plus
Product codes 0756+/0757+/0761+

HSNO approval Not applicable – non hazardous

Approval description NA
UN number NA
DG class NA
Proper Shipping Name NA
Packaging group NA
Hazchem code NA

Uses For use as a feed additive

Company Details

Company Nutritech International Physical Address 6 Aintree Avenue

Airport Oaks, Mangere Auckland

Postal Address New Zealand PO Box 201 231

Auckland Airport

2150 New Zealand

Telephone0800 736 336 (0800 REMEDY)Emailcustomerservices@nutritech.co.nz

2. Hazard Identification

Approval in New Zealand

This product is not considered hazardous under the Hazardous Substances and New Organisms Act (HSNO), according to the criteria in the Hazardous substances (Hazard Classification) Notice 2020.

GHS 7 Classes

Hazard Statements

None

SYMBOLS

none

Other Classification

There are no other classifications that are known to apply.

Precautionary Statements

none

3. Composition / Information on Ingredients

Component	CAS/ Identification	Concentration
Ingredients not contributing to GHS classes which includes bentonite,	NA	100%
oregostim™, vitamins and minerals		

This is a commercial product whose exact ratio of components may vary. Trace quantities of impurities are also likely.

Nutritech International Limited

6 Aintree Avenue, Airport Oaks, Mangere, Auckland 2022 PO Box 201231, Auckland Airport 2150 Customer Service **0800 REMEDY**(736339) P: 09 276 1185, www.nutritech.co.nz

First Aid

General Information

You should call the National Poisons Centre if you feel that you may have been harmed or irritated by this product. The number is 0800 764 766 (0800 POISON) (24 hr emergency service).

Recommended first aid Ready access to running water is recommended.

facilities

Exposure

Swallowed Do NOT induce vomiting. Give a glass of water to drink. Contact a doctor if concerned. Eye contact

If product gets in eyes, wash material from them with running water for several minutes.

If symptoms persist, seek medical advice.

Skin contact Flush with water. Remove all contaminated clothing. Contact a doctor if experiencing

symptoms

Inhaled Generally, inhalation of dusts is unlikely to result in adverse health effects. If coughing,

> dizziness or shortness of breath is experienced, remove the patient to fresh air immediately. If patient is unconscious, place in the recovery position (on the side) for

transport and contact a doctor.

Advice to Doctor

Treat symptomatically

5. Firefighting Measures

Fire and explosion hazards: There are no specific risks for fire/explosion for this chemical. It is not classed as

flammable.

Suitable extinguishing

substances:

Unsuitable extinguishing

substances:

Products of combustion:

Unknown.

Carbon dioxide, and if combustion is incomplete, carbon monoxide and smoke. Water.

May form toxic mixtures in air and may accumulate in sumps, pits and other low-lying

spaces, forming potentially explosive mixtures.

Protective equipment:

Hazchem code:

Disposal

No special measures are required. NA

Accidental Release Measures

Containment

Emergency procedures

There is no current legal requirement for containment of this product.

Carbon dioxide, extinguishing powder, foam, fog sprays, water jets.

If a significant spill occurs:

Stop leak if safe/necessary; Isolate area. Collect spill – see below; Transfer to container

for disposal. Dispose of according to guidelines below (Section 13).

Collect and seal in properly labelled containers or drums for disposal. If contamination of Clean-up method crops, sewers or waterways has occurred advise local emergency services.

> Sweep up and collect recoverable material into labelled containers for recycling or salvage. Recycle containers wherever possible. This material may be suitable for

approved landfill. Dispose of only in accord with all regulations.

Precautions Avoid the creation of dust. No special protective clothing is normally necessary.

7. Storage & Handling

Storage Avoid storage of harmful substances with food. Containers should be kept closed in

order to minimise contamination. Keep from extreme heat and open flames. Avoid

contact with incompatible substances as listed in Section 10.

Handling Keep exposure to a minimum, and minimise the quantities kept in work areas. See

section 8 with regard to personal protective equipment requirements.

Nutritech International Limited

6 Aintree Avenue, Airport Oaks, Mangere, Auckland 2022 PO Box 201231, Auckland Airport 2150 Customer Service 0800 REMEDY (736339) P: 09 276 1185, www.nutritech.co.nz

8. Exposure Controls / Personal Protective Equipment

Workplace Exposure Standards

A workplace exposure standard (WES) has not been established by WorkSafe NZ for this product. There is a general limit of 3mg/m³ for respirable particulates and 10mg/m³ for inhalable particulates when limits have not otherwise been established.

NZ Workplace Ingredient WES-TWA WES-STEL

Exposure Stds Bentonite may include trace of 0.025mg/m³ (respirable, silica) NA

crystalline silica

Engineering Controls

In industrial situations, it is expected that employee exposure to hazardous substances will be controlled to a level as far below the WES as practicable by applying the hierarchy of control required by the Health and Safety at Work Act (2015) and the Health and Safety at Work (General Risk and Workplace Management) Regulations 2016. Exposure can be reduced by process modification, use of local exhaust ventilation, capturing substances at the source, or other methods. If you believe air borne concentrations of mists, dusts or vapours are high, you are advised to modify processes or increase ventilation.

Personal Protective Equipment

Eyes Protective eyewear is not normally necessary when using this product. However, it

always prudent to use protective eyewear if splashes are likely or if handling material in

bulk.

Skin If discomfort is felt (e.g., if pre-existing conditions exist, such as dermatitis, cuts or

sensitive skin), gloves may be helpful. If you suffer from dermatitis type skin conditions, use gloves. Nitrile or NBR gloves are recommended. Replace frequently. Gloves should

be checked for tears or holes before use.

Respiratory A respirator when airborne concentrations approach the WES (section 8). Use respirator

with a dust/particulate cartridge. If using a respirator, ensure that the cartridges are

correct for the potential air contamination and are in good working order.

WES Additional Information

Not applicable

9. Physical & Chemical Properties

Appearance solid powder Odour Not specified **Odour Threshold** no data no data Freezing/melting point no data **Boiling Point** no data Flashpoint no data **Flammability** non flammable **Upper & lower flammable limits** no LEL or UEL Vapour pressure no data

Vapour density no data
Specific gravity/density no data

Solubility miscible in water

Partition coefficient no data
Auto-ignition temperature no data
Decomposition temperature no data
Viscosity no data
Particle Characteristics no data

10. Stability & Reactivity

Stability Stable

Containers should be kept closed in order to avoid contamination. Keep from extreme

heat and open flames. Keep away from moisture.

Incompatible groups none known Substance Specific none known

Incompatibility

Hazardous decomposition

products

May emit toxic vapours if heated to decomposition

Hazardous reactions none known

11. Toxicological Information

Summary

No effects anticipated.

Supporting Data

Acute Oral Using LD₅₀'s for ingredients, the Acute Toxicity Estimate (ATE) (oral) for the mixture is

>2000 mg/kg.

Dermal Using LD₅₀'s for ingredients, the Acute Toxicity Estimate (ATE) (dermal) for the mixture

is >2000mg/kg

Inhaled Using LD₅₀'s for ingredients, the Acute Toxicity Estimate (ATE) (inhalation) for the

mixture is >5mg/L/4h.

Eye The mixture is considered to be an eye irritant.

Skin The mixture is not considered to be a skin irritant.

Chronic Sensitisation No ingredient present at concentrations > 0.1% is considered a sensitizer.

 $\begin{tabular}{lll} \textbf{Mutagenicity} & No ingredient present at concentrations > 0.1\% is considered a mutagen. \\ \textbf{Carcinogenicity} & No ingredient present at concentrations > 0.1\% is considered a carcinogen. \\ \textbf{Reproductive} / & No ingredient present at concentrations > 0.1\% is considered a reproductive or \\ \end{tabular}$

Developmental developmental toxicant or have any effects on or via lactation.

Systemic No ingredient present at concentrations > 1% is considered a target organ toxicant.

Aggravation of None known.

existing conditions

12. Ecological Data

Summary

This substance is not considered ecotoxic. In all cases prevent discharge to drain, sewers and waterways.

Supporting Data

Aquatic Using EC₅₀'s for ingredients, the estimated EC₅₀ for the mixture is > 100 mg/L.

Bioaccumulation No data
Degradability No data

Soil No evidence of soil toxicity.

Terrestrial vertebrate See acute toxicity.

Terrestrial invertebrate No evidence of toxicity towards terrestrial invertebrates.

Biocidal no data

Environmental effect levels No EELs are available for this mixture or ingredients

13. Disposal Considerations

Restrictions There are no product-specific restrictions, however, local council and resource consent

conditions may apply, including requirements of trade waste consents.

Disposal method Disposal of this product must comply with the Hazardous Substances (Disposal) Notice

2017 and the requirements of the Resource Management Act for which approval should

be sought from the Regional Authority.

Contaminated packaging Disposal of contaminated packaging must comply with the Hazardous Substances

(Disposal) Notice 2017 clause 12. Ensure that the package is rendered incapable of containing any substance and is disposed in a manner that is consistent with the requirements of the substance it contained and the material of the package. If possible

reuse or recycle packaging.

15. Regulatory Information

This substance is not considered to be hazardous under HSNO. All ingredients appear on the NZIoC.

Specific Controls

Key workplace requirements are:

SDS Not required (non hazardous), but best practice to have the SDS available.

Inventory An inventory of all hazardous substances must be prepared and maintained.

Packaging

All hazardous substances should be appropriately packaged including substances that have been decanted, transferred or manufactured for own use or have been

supplied

Labelling Must comply with the Hazardous Substances (Labelling) Notice 2017.

Emergency plan Not required. Certified handler Not required. Tracking Not required. Bunding & secondary containment Not required. Signage Not required. Location compliance certificate Not required. Flammable zone Not required. Fire extinguisher Not required.

Note: The above workplace requirements apply if only this particular substance is present. The complete set of controls for a location will depend on the classification and total quantities of other substances present in that location.

Other Legislation

In New Zealand, the use of this product may come under the Resource Management Act and Regulations, the Health and Safety at Work Act 2015 and the Health and Safety at Work (General Risk and Workplace Management) Regulations 2016, local Council Rules and Regional Council Plans.

16. Other Information

Abbreviations

Approval Code not applicable – non hazardous.

CAS Number Unique Chemical Abstracts Service Registry Number

EC₅₀ Ecotoxic Concentration 50% − concentration in water which is fatal to 50% of a test

population (e.g. daphnia, fish species)

EPA Environmental Protection Authority (New Zealand)

Nutritech International Limited 6 Aintree Avenue, Airport Oaks, Mangere, Auckland 2022

PO Box 201231, Auckland Airport 2150 Customer Service 0800 REMEDY (736339) P: 09 276 1185, www.nutritech.co.nz

GHS Globally Harmonised System of Classification and Labelling of Chemicals

HAZCHEM Code Emergency action code of numbers and letters that provide information to emergency

services, especially fire fighters

HSNO Hazardous Substances and New Organisms (Act and Regulations)

IARC International Agency for Research on Cancer
LEL/UEL Lower Explosive Limit/ Upper Explosive Limit

LD50 Lethal Dose 50% – dose which is fatal to 50% of a test population (usually rats).

Lethal Concentration 50% – concentration in air which is fatal to 50% of a test population

(usually rats)

MSDS (SDS)

Material Safety Data Sheet (or Safety Data Sheet)

NZIoC New Zealand Inventory of Chemicals

STEL Short Term Exposure Limit - The maximum airborne concentration of a chemical or

biological agent to which a worker may be exposed in any 15 minute period, provided the

TWA is not exceeded

TWA Time Weighted Average – generally referred to WES averaged over typical work day

(usually 8 hours)

UN Number United Nations Number

WES Workplace Exposure Standard - The airborne concentration of a biological or chemical

agent to which a worker may be exposed during work hours (usually 8 hours, 5 days a week). The WES relates to exposure that has been measured by personal monitoring

using procedures that gather air samples in the worker's breathing zone.

Disclaimer

This SDS was prepared by Datachem LTD and is based on our current state of knowledge, including information obtained from suppliers. The SDS is given in good faith and constitutes a guideline (not a guarantee of safety). The level of risk each substance poses is relevant to its properties (as summarised in the SDS) AND HOW THE SUBSTANCE IS USED. While guidelines are given for personal protective equipment, such precautions must be relevant to the use. The likely GHS classifications for this SDS have been estimated based on general information from the supplier (e.g., hazard, toxicological). This SDS is copyright Datachem and must not be copied, edited or used for other than intended purpose. To contact the SDS author, email info@datachem.co.nz or phone: +64 21 1040951.
